EDUCATION

Masters in Computer Application [Integrated Course] – (80%)
Raja Balwant Singh Management Technical Campus, Agra

Aug 2018 – July 2023

SKILLS

Languages: HTML, CSS, JavaScript, C, C++, Python (Basics)

Frameworks & Libraries: ReactJS, Redux, React-Router, Angular, Tailwind CSS

Tools: Vite, Git, GitHub, Gitlab

Platform: Windows, Visual Studio Code, Antigravity

EXPERIENCE

Frontend Developer | EasyQ Solutions and Technologies Pvt. Ltd.

Nov 2025 – Jun 2026

Worked as a Frontend Developer at a product-based company specializing in healthcare quality management solutions. Developed and maintained responsive, user-friendly frontend components using Angular, TypeScript, JavaScript, HTML5, CSS3, SCSS, and Bootstrap. Implemented responsive UI designs and integrated frontend applications with RESTful back-end APIs. Developed reusable UI components, reactive forms, dashboards, and workflow-based modules. Participated in code reviews and collaborated with backend teams to ensure smooth API integration and application functionality. Used Git and GitLab for version control while following Agile development practices.

PROJECTS

To-Do List [\[Link\]](#)

Dec 2024 - Dec 2024

- Built an interactive task management app using **HTML, CSS, and JavaScript** featuring task **creation, completion, deletion and local storage** for persistent data.
- Implemented **DOM manipulation and event handling** with a responsive, user-friendly interface for an efficient task management experience.

Swiggy - Food App [\[Link\]](#)

May 2025 - May 2025

- Developed a **dynamic food delivery platform** inspired by **Swiggy**, fetching **real-time restaurant and dish data** using the **Swiggy API**.
- Implemented a **fully functional shopping cart** with **add/remove dishes** capability using **Redux** for seamless state management.
- Designed **multi-page navigation** including **Home, Search, Offers, Help, and Sign-in pages**, with smooth **client-side routing** using **React Router**.

Crypto-Track [\[Link\]](#)

June 2025 - June 2025

- Developed a **dynamic, responsive cryptocurrency dashboard** using the **CoinGecko API** to fetch **real-time coin data** and support **multiple currencies** (USD, INR, EUR) with instant updates.
- Visualized **coin trends** through **interactive line charts** using the **react-google-charts** library for insightful analytics.
- Implemented **multi-page navigation** with **React Router**, ensuring smooth view switching and a user-friendly responsive interface across devices.

YouTube App [\[Link\]](#)

July 2025 - July 2025

- Built a **feature-rich YouTube clone** with real-time data fetching via **YouTube API v3** and an **interest-based filtering system** for personalized content.
- Integrated **Firebase Authentication** for secure login/logout with user details stored in the database, and designed a **responsive, user-friendly UI** that enables seamless video playback with recommended suggestions and comment viewing.

Certifications

- Certificate of Excellence – React.js Development, **Coding Ninjas**
Recognized for outstanding performance in mastering React.js concepts
